Personal Profile

I'm a Computer Science postgraduate student with a passion for technology and a strong desire to contribute to the ever-evolving world of software development and computer science. I have acquired hands-on learning experience in backend and application development through academic projects and internships. Familiar with Java, Python and understanding the fundamentals of the software development lifecycle. Eager to learn, improve continuously, and contribute to building reliable, scalable, and high-quality software solutions with a growing interest in backend systems and AI-driven applications.

Skills

- **Programming Languages:** Java, Python
- **Databases:** MySQL, MongoDB
- **Web Development:** HTML5, CSS3, JavaScript, React.js, Node.js
- **Data Analytics & Visualization:** Power BI, Tableau, DAX, Power Query
- **Cloud & OS:** Basic understanding of AWS, Ubuntu
- **Automation & Tools:** Excel VBA, RPA, Git, Jupyter Notebook
- **Core Concepts:** Object-Oriented Programming, Software Development Life Cycle
- **Soft Skills:** Strong Communication, Team work, Adaptability

Projects

AI Powered Resume Builder (Technologies used: React.js, Node.js, Express.js, Hugging Face NLP Models) - [GitHub Link](#)

- Built a full-stack AI-powered resume builder using React and Node.js, enabling users to generate professional resumes with AI-generated summaries, skill classifications, and job descriptions.
- Integrated Hugging Face NLP models to intelligently categorize skills, enhance content quality, and provide a resume completeness score, improving resume effectiveness.
- Delivered a responsive, multi-template platform with real-time editing, auto-save, and PDF export, significantly simplifying resume creation for freshers and professionals.

Oral Cancer Prediction System (Technologies used: Python, TensorFlow, Keras, CNN, Flask) - [GitHub Link](#)

- Developed an AI-driven oral cancer detection web application using CNNs with TensorFlow and Flask, enabling fast and accurate image-based screening.
- Designed and trained a custom deep learning model with data augmentation to classify oral cavity images as Cancer or Non-Cancer, supporting early detection use cases.
- Deployed a secure, responsive web interface with real-time predictions, providing an accessible preliminary screening tool to assist healthcare professionals and users.

Education

PSGR Krishnammal College for Women, Coimbatore

Jul 2024 - Present

MSc in Computer Science | Current CGPA: 9.1

Sri Ramakrishna College of Arts & Science for Women, Coimbatore

Sept 2021 - May 2024

Bachelor of Computer Application | CGPA: 8.9

Internship

CIRCOR Flow Technologies, Coimbatore - Business Intelligence / Data Analytics Intern

Dec 2025 – Feb 2026

- Designed and developed interactive Power BI dashboards to analyze Supplier On-Time Delivery (SOTD), DPPM (Defective Parts Per Million), and global sourcing performance across suppliers, business units, and regions using Power BI, Power Query, and DAX.
- Built a rolling 3-month DPPM dashboard using industry-standard quality metrics to enable trend analysis and data-driven supplier quality decisions.
- Automated shipping order template generation at PO release using Excel VBA macros, reducing manual effort, improving operational efficiency, and ensuring process standardization.

VConnect Media, Coimbatore - Media & Design Intern

Jul 2023– Oct 2023

- Created and managed corporate and informal visual content, including posters, invitations, and marketing creatives using Adobe Photoshop and Premiere Pro.
- Consistently delivered high-quality outputs, earning an 'A' grade for all submitted work, reflecting strong attention to detail and creative execution.

Achievements & Volunteering

- E. Balagurusamy Gold Medal awardee for being the Computer Science Department topper (2021- 2024 batch), awarded in 2025.
- Academic Class Topper for BCA for three consecutive years (2021–2024).
- NCC 'C' Certificate Holder, sergeant demonstrating discipline, leadership, teamwork, and commitment to social responsibility.
